We are extremely proud to introduce our newest Max Sprayer model, the 28LT100. The Max 28" Lift Type Sprayer is a new design and different from anything else on the market. It was built from the feedback of pecan, blueberry, peach, citrus and other orchard farmers. The sprayer's design offers growers better spray coverage, dependability and smoother operation. Built with less maintenance & repair in-mind. We are sure you will be very satisfied and impressed with this sprayer. We look forward to doing business with you!
